Propane Powered Strippers

KEY FEATURES

- Designed for fast high production stripping
- Safety first - safety last
- Super clean catalytic converter
- 80% safety fill tank
- Large non-slip tires
- Centrifugal clutch
- E.P.A. Approved
- C.A.R.B. Approved

SPECIFICATIONS

	Stripper 21"		Stripper-Buffer 21" Combo
Part Number	08006A	08008A	08009A
Emissions Control	Carb Gard	N/A	N/A
Engine	13 hp Kawasaki V-Twin Cylinder		
Brush Speed	1050 RPM		N/A
Stripping Path	21" (53.3 cm)		21" (53.3 cm)
Electrical System	12 Volt		
Ignition System	Electronic		
Fuel Tank	20 lbs. (9 kg) 80% safety fill, painted steel		
Brushes (single)	20" (50.8 cm) carbon impregnated		
Frame	Cast aluminum alloy powder coated finish		
Engine Starting System	12 Volt battery system		
Catalytic Converter	Standard		
Low Oil Shut-Down	Standard		
Electrical Fuel Lock-Off	Standard		
Centrifugal Clutch	Standard		
Size - Single (L x W x H)	52 x 29 x 45" (132 x 99 x 114.3 cm)		
Weight/Shipping Weight - Single	242 lbs. (117 kg)		258 lbs. (117 kg) / 392 lbs. (177.8 kg)
Warranty	2 Year Parts & Labor, 12 V battery warranted by manufacturer, Engines are warranted by manufacturer		

PRODUCT

- Available in 21 inch single brush
- Powered by clean running Kawasaki 13 HP twin V engine
- Rugged cast aluminum alloy housings
- Solution containment splash guards
- Impregnated supergrit brushes
- Battery start
- Hour meter aids in scheduling service intervals
- Powder coated finish resists oxidation and chemical damage - cleans easily and assists in maintaining appearance

EASE OF USE

- Battery start eliminates difficult manual pull start
- Ergonomically designed loop handle reduces operator fatigue

- Handle easily adjusts to operator height
- Tank changes made easy with drop-in holder and quick-snap fastener
- Large non-slip tires ease transport and control

PRODUCTIVITY

- Powerful 13 HP engine maintains speed under heaviest loads
- Grit brushes strip old finish quicker
- Wide 21 inch scrub path
- Large 20 pound propane tank provides more working time between refills
- Automatic compression release reduces starter wear
- 1050 RPM brush speeds strip faster
- Splash guards keep stripper solution under machine and assists with first pass performance
- Large non-slip tires assist with control of machine in slippery operations so operator can move faster

SAFETY

- Super clean catalytic converter aids with improved air quality
- Centrifugal clutch - brushes do not turn until engine rpm's are at working speed
- 80% fill tank reduces damage to propane system components from overfilling
- Low oil shut-down system protects engine
- Electrical fuel lock-off system stops gas flow when engine stops
- Total electrical shut-off system prevents battery drain when engine stops
- UL approved propane system components
- Non-slip tires give operator more control under slippery stripping conditions

OPTIONS/ACCESSORIES

- Cleaning and stripping chemicals
- High speed finish system or restoration system
