Clarke® American Sanders®

Clarke® is proud to introduce the newest innovation in floor sanding equipment, the EZ-Sand Orbital Sander.

Designed with steel, aluminum, and iron components, this machine delivers the rugged durability that you have come to expect from Clarke American Sanders®.

With its unique appearance, a handle that can rotate 360 degrees, and its two piece modular design, it is clear that this machine is no ordinary sander. In fact, it is a multi-purpose machine that can be used to sand both large and small areas on any project.

Its compact design allows it to sand edges, wall lines, and closets, and its powerful three-motor, triple-head design allows it to effectively sand large, open areas. The orbital sanding action makes it a very stable machine that is easy to run for use with or against the grain.

The EZ-Sand features a modular design that allows the handle to quickly separate from the base of the machine. This makes it incredibly easy to transport to and from any home or job-site. The sander is also equipped to use either a standard dust bag or dust vacuum for superior dust collection.

This is *the* perfect sanding machine.

Modular design allows the sander to disassemble into two pieces for easy service and transportation

Hook and Loop paper attachment uses 6-7/8 in. paper and makes changing paper quick and easy.

The handle sleeve allows the handle to be locked in the upright position for storage, or released for operation.

Triple pad design gives full sanding coverage while the triple motor design allows each pad to be driven directly from the motor – no belts to service.

Components made from steel, aluminum, and iron for increased durability

Die-cast aluminum handle with molded on rubber grips provides durability and comfort

Safety interlock switch design prevents accidental starts

Rugged 1.5 in. steel handle tube is chrome plated to prevent corrosion

Rear mounted dust bag allows for excellent visibility

U-Joint style handle base gives the handle 360 degree maneuverability

Zipper opening on bag makes dust easy to remove

Lifting handle for easy transportation

Large transport wheels roll easily over uneven surfaces and thresholds

Dust skirt prevents dust from becoming airborne

Vacuum-ready dust pipe design easily fits a 1.5 in. vacuum hose for use with a dust control vacuum system.

Three-head sanding design will sand the entire floor, including edges and wall lines.

EZ-Sand

Orbital Sander

KEY FEATURES:

- Orbital sanding action
- Modular two-piece design
- Steel, aluminum, and iron components
- Vacuum-ready dust pipe
- Triple-motor/triple-pad design
- Sands open areas and wall lines

SPECIFICATIONS	EZ-Sand
Part Number	07164A
Motors	Three 1/3-HP motors
Voltage	120V/60hz
Amp Draw	10 amps during operation
Paper Size	6-7/8 in.
Paper Type	Hook and Loop
Wheels	Grey, non-marking
Dust Collection	Dust Bag w/ Vacuum-Ready Dust Pipe
Power Cable	40 ft., grey, non-marking
Dimensions (L x W x H)	19 x 16.25 x 44.75 in.
Weight	102 lbs.
Warranty	1 year, parts and labor

For superior dust collection, combine the EZ-Sand with a dust control vacuum from Clarke American Sanders
