*Because Pride Still Matters.*

# Super 7R Edger

Rotating dust pipe allows the dust bag or hose connection to move freely out of the way during operation. The Super 7R pipe rotates 210° and the B-2+ pipe rotates 260°.

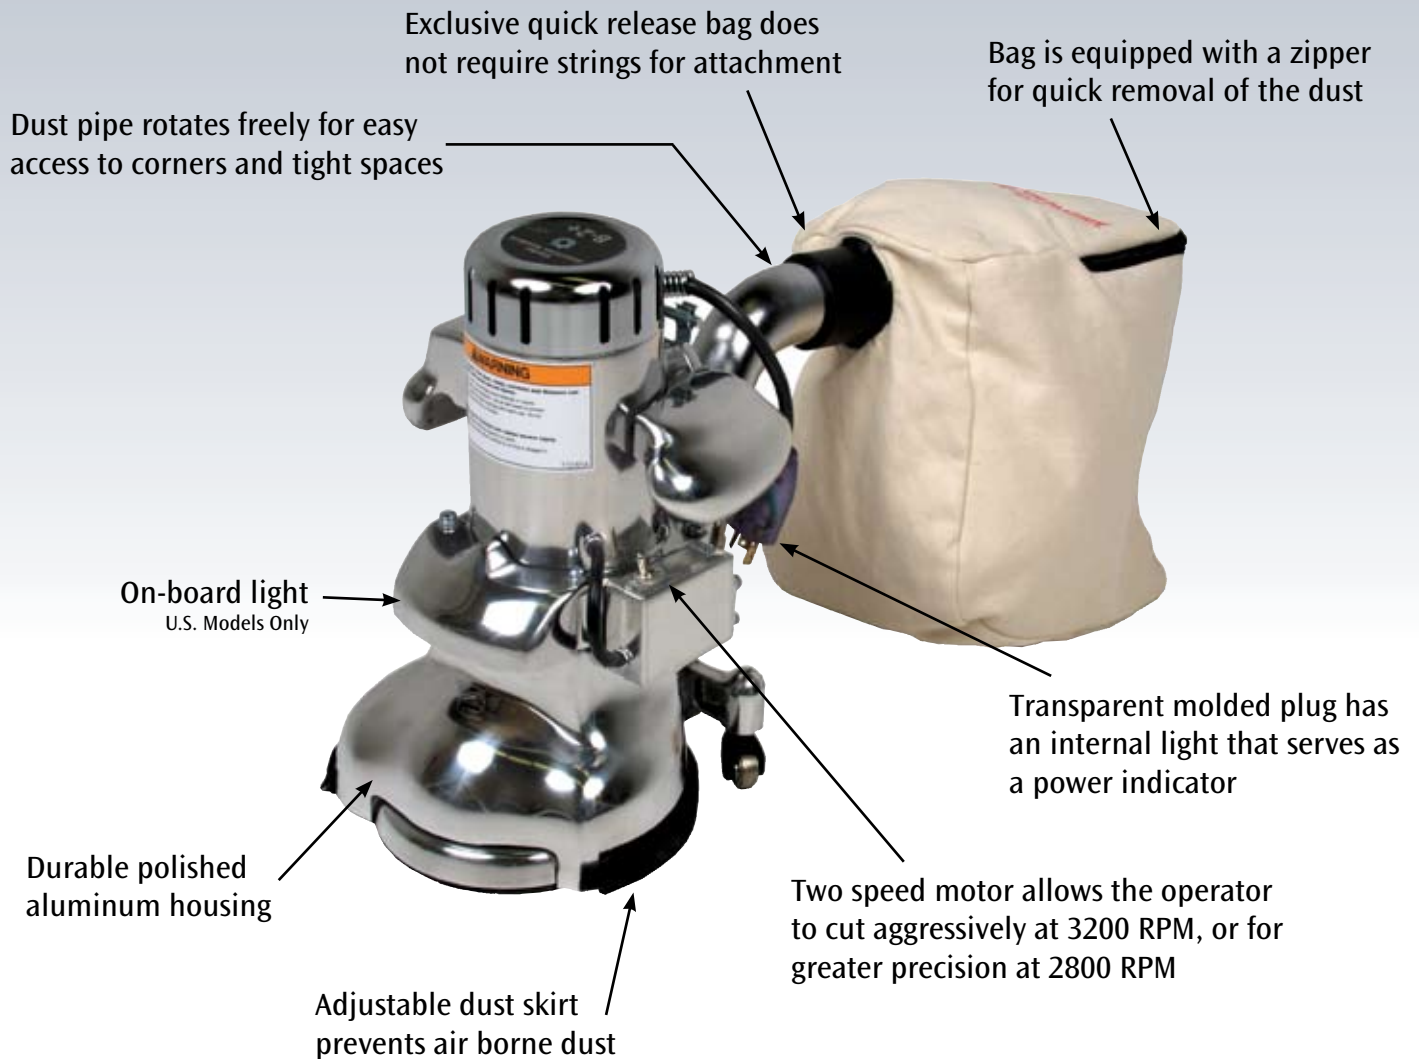

Exclusive quick release bag uses an interior rib to secure itself to the dust tube. No strings needed. Patent pending.

The channel feature in the dust tube securely locks the dust bag in place, yet allows it to be removed with a simple twist and pull.

# B-2+ Edger

Replace the bag with the hose adaptor and the edger can be easily hooked up to a 1-1/2" vacuum hose.

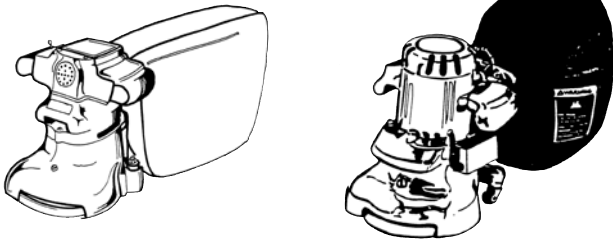

The new dust control features can be purchased as a retro-fit kit for other Super 7R and B-2+ models.

Non-marking urethane wheels are available as accessories for your Super 7R and B-2+ edgers.
